

Job Description

Job role	Clinical/Forensic/Counselling Psychologist
Job Title	Senior Psychologist
Department	Integrated Mental Health Team
Accountable to	Head of Healthcare
Professionally accountable to	National Head of Psychological Therapies

Practice Plus Group's mission is **Access to Excellence**. Our core values are;

- We treat patients and each other as they would like to be treated
- We act with integrity
- We embrace diversity
- We strive to do things better together

Patients can only access excellence if we commit to living our values in everything we do when we're at work.

We believe in putting the patient first, regardless of the environment or their history. The prison population is one of the most vulnerable and marginalised patient groups in society and the delivery of their health care is conducted within often difficult and demanding environments.

The Role

The Senior Psychologist will work within a Category A prison, a facility that houses individuals convicted of serious and violent crimes, including sexual offences, where the need for specialized psychological support is paramount. This role focuses on embedding a trauma-informed and multidisciplinary approach to care, aimed at minimizing further re-traumatization for people in prison while also addressing the impact and secondary trauma of staff to reduce burnout. As a clinical leader, the Senior Psychologist will develop and implement evidence-based interventions that foster resilience and recovery among men in prison, while simultaneously providing support and training to staff to enhance their understanding of trauma and its effects. By working closely with multidisciplinary teams, the Senior Psychologist will ensure the delivery of high-quality mental health care, develop and implement trauma informed and evidence-based treatment programs in line with the Psychological Therapies Services (PTS) model, and contribute to the formulation of policies and practices that promote psychological wellbeing. In addition to clinical responsibilities, this position includes managerial expectations, such as overseeing junior/trainee psychologists, coordinating mental health services, and contributing to the development of policies that promote a supportive environment for both patients and staff. By cultivating culture of empathy and understanding, the Senior Psychologist will play a crucial role in improving the overall psychological wellbeing of the prison population and the staff, ultimately contributing to a more effective and compassionate correctional environment.

MAIN DUTIES/RESPONSIBILITIES

Clinical -

- To provide highly specialist psychological assessment of patients based upon the appropriate use, interpretation and integration of complex data from a variety of sources including psychological and neuropsychological tests, self-report measures, rating scales, direct and indirect structured observations and semi-structured interviews with patients, family members (when appropriate) and others involved in the patient's care.
- To provide specialist psychological advice, guidance and consultation to other professionals contributing directly to patient's formulation, diagnosis and treatment plan;
- To be responsible for implementing a range of psychological interventions for individuals and groups, adjusting and refining psychological formulations drawing upon different explanatory models, and maintaining a number of provisional hypotheses; engage in structured and dynamic risk assessments;
- To evaluate and make decisions about treatment options taking in to account both theoretical and therapeutic models and highly complex factors including historical and developmental processes that have shaped the individual, family or group;
- To contribute directly and indirectly to a trauma informed, psychologically-based framework of understanding and care to the benefit of all clients of the service, promoting the psychological mindedness of staff;
- To contribute a psychosocial, trauma informed perspective within the multidisciplinary team including for those patients not directly on the psychologist's caseload and attend individual patient reviews and risk management meetings where appropriate;
- To attend ACCT reviews and segregation reviews in the prison as appropriate and to offer psychological opinion about management and appropriate referrals in that context and, offer psychological understanding into CSIP plans to support management of patients within the wing by prison staff;
- To communicate in a skilled and sensitive manner, highly complex/sensitive information concerning the assessment, formulation and treatment plans to the patient, appropriate professional colleagues and to family members, as appropriate, and to monitor and evaluate progress during the course of multi-disciplinary discussions;
- To be able to complete and interpret formal psychometric assessments;
- To maintain accurate clinical records and keep the PTS dashboard up to date with outcomes data for patient/service and staff outcomes;
- To contribute to the development of specialized individual treatment plans or packages of care for patients with complex psychological problems and who may present a risk of harm to themselves or others;
- To be able to manage the emotional impact of working, often one-to-one, with people who can be in crisis, who can show high levels of arousal and can be actively self-harming or suicidal;
- To work jointly with other psychologists/therapists, to plan and hand over the psychological assessment and treatments of patients that may continue after either transfer to other prisons or released in the community or other recovery-based settings.
- In liaison with Mental Leads and/or Heads of Healthcare and the National head of Psychological Therapies, identify opportunities for and conduct service development projects in collaboration with other members of the multidisciplinary team;
- Participate in and contribute to CPD and peer supervision within the wider healthcare team;
- Active engagement in appropriate practice supervision.

Teaching, training and supervision –

- To receive regular clinical supervision from an appropriately qualified and experienced supervisor, in accordance with the BPS and the HCPC guidelines and, where appropriate, from other senior professional colleagues and, to supervise junior psychology colleagues and other therapists and MDT colleagues as appropriate;

- To provide training and supervision for members of the service (healthcare and prison) in the delivery of psychologically, trauma informed care and treatment;
- To provide specialist advice and consultation and training to members of other disciplines within the teams and to non-psychology manager of the teams on psychological understanding, interventions and evaluations;
- To develop and deliver teaching as appropriate for members of staff from other disciplines;
- Responsible for planning, delivery and clinical supervision of a specialist psychology training placement for trainees on the postgraduate doctoral courses in clinical/counselling and/ or forensic psychology;
- To develop further post-qualification experience in psychology over and above that provided through training by engaging in a clearly planned CPD programme in accordance with British Psychological Society guidance and in line with service model and needs;
- To contribute to peer psychology supervision sessions.

Management, recruitment, policy and service development –

- To plan and supervise the work of undergraduate psychology students, and trainee psychologists and be responsible for their support in their placements;
- To contribute to proposals and implementation of policy and service development changes in relation to psychology and psychological therapies;
- To advise the Mental Health lead and/or Heads of Healthcare on those aspects of the service where psychological matters need addressing in line with best practice and service objectives;
- Responsible for contributing to the planning, organizing, auditing and developing of policy strategies for the delivery of the psychological therapies service;
- To contribute to proposals for and implementation of policy and service development changes in relation to psychology and psychological therapies within the service;
- To take responsibility for representation of the profession at appropriate service development and governance meetings as agreed with their Line Manager and in line with Personal and Professional Development Plans (PDPs);
- To contribute to recruitment shortlisting and interviewing as appropriate across the service;

Research, service evaluation & audit –

- To utilise theory, evidence based literature and research to support evidence based practice in individual/ group work and work with other team members;
- To undertake project management, including complex audit, research and service evaluation projects, with colleagues within the service, to help develop service provision;
- To prepare and present information from audits, evaluations and research to professional audiences within and outside the Organisation
- To prepare papers for publication based on audit, evaluation, research and development work
- To utilise theory, evidence based literature and research to support evidence based practice in individual work and work with other team members.

Professional -

- To attend regional and national Psychological Therapies meetings, service development and other relevant meetings regularly;
- To adhere to professional/accrediting body codes of conduct, policies and procedures (e.g. HCPC, BABCP, BPS);
- To be aware of, adhere to, and where appropriate, contribute to the formulation and review of Practice Plus Group policies and procedures;

- To maintain and develop high standards of psychology/psychological therapy practice by engaging in continuing professional development and co-operative working/networking with therapists, clinical, counselling and forensic psychologist colleagues;
- To receive regular line management supervision by the Head of Healthcare
- To participate in the organisation’s annual performance review and personal development planning process with the clinical supervisor and line manager;
- To keep up to date with legislation, national directives, policies and NICE guidelines in relation to the work delivered.

Other –

This Job Description is not exhaustive and may change as the post develops, but such change will not take place without consultation between the post holder and their manager. Job descriptions should be reviewed at least annually at the appraisal meeting.
